DETAILED ACTION

Allowable Subject Matter

Claims 1-5 are allowed. The following is a statement of reasons for the indication of allowable subject matter: With respect to the Final Rejection filed 23 August 2006, the prior art made of record (Medvedev et al.) teaches a method for wireless communication between a first communication device and a second communication device comprising a first communication device that computes the magnitude of the complex transmit antenna weight vector associated with each antenna is such that the power to be output at each antenna is the same and is equal to the total power to be output by all of the plurality of antennas divided by the number of antennas but does not also teach that the sum of the power at each corresponding frequency across the plurality of transmit signals is equal to a constant.

Conclusion
